

/home/n5/dev/cpp/vinecopulib
/include/bicop/family.hpp

```
graph TD; A["/home/n5/dev/cpp/vinecopulib  
/include/bicop/family.hpp"] --> B["vector"]; A --> C["string"];
```

The diagram illustrates a file inclusion relationship. A top-level box contains the file path `/home/n5/dev/cpp/vinecopulib/include/bicop/family.hpp`. Two blue arrows originate from the bottom of this box, pointing to two separate boxes below. The left box is labeled `vector` and the right box is labeled `string`, indicating that the `family.hpp` file includes these two headers.

vector

string
